FRESHER FULL STACK DEVELOPER

A skilled full stack web developer specializing in building dynamic and responsive websites. With a strong command over HTML, CSS, JS, React.js, and MERN stack. Additionally, I bring a creative approach to problem-solving and a passion for delivering high-quality results.

BACKEND

As a backend developer, I specialize in creating RESTful APIs to facilitate communication between the frontend and backend. I follow the MVC (Model-View-Controller) architectural pattern to organize the codebase effectively. In addition to implementing CRUD (Create, Read, Update, Delete) operations, I prioritize error handling to ensure robustness and reliability in my APIs.

FRONTEND

In frontend, I excel in React.js, crafting responsive interfaces. With expertise in accessibility and usability, I ensure engaging user experiences. By prioritizing clean, modular code, I optimize development efficiency. Passionate about intuitive design, I blend creativity with technical skill for impactful projects.

SKILLS

- React js
- WebSocket
- JavaScript
- RESTful API
- EJS
- Github
- Node js
- Mongo db
- Figma

PROJECTS

- **Portfolio-about me**   • <u>Github</u>
  this is my portfolio that shows about my skills and achievements created by HTML, CSS, JavaScript, React js.
